

# Flughafen Stuttgart – Routenanpassung TEDGO

## Lärmtechnische Bewertung

Ergebnispräsentation Gemeinde Neuhausen

12. April 2022

Markus Petz

Dipl. Geophys. Markus Petz

Geschäftsführer der ACCON GmbH mit Sitz in Greifenberg

Hauptbetätigungsfeld: Fluglärmuntersuchungen

- für Luftrechtliche Genehmigungsverfahren
- für die Strategische Lärmkartierung nach Umgebungslärmrichtlinie
- für die Lärmaktionsplanung im Auftrag von Ministerien, Gemeinden und Flughäfen
- als Lärmschutznachweis zur Überwachung von Auflagen in der Betriebsgenehmigung

# Sachverhaltsdarstellung

- Neue Flugverfahren werden durch die DFS Deutsche Flugsicherung GmbH (DFS) geplant und vom Bundesaufsichtsamt für Flugsicherung (BAF) durch Rechtsverordnung festgelegt.
- Vor der Antragstellung eines neuen Flugverfahrens ist die Fluglärmkommission zu den beabsichtigten Maßnahmen anzuhören. Die DFS ist dabei nicht an die Empfehlung der Fluglärmkommission gebunden
- Auf Vorschlag der Eurowings GmbH und der Deutschen Lufthansa AG hat die DFS Varianten einer neuen RNP-basierten Abflugroute (Required Navigation Performance) geplant und in der Fluglärmkommission vorgestellt
- Die neue Abflugroute gilt für Starts in Richtung Osten und endet am Wegpunkt TEDGO südlich des Flughafens
- Route TEDGO\_neu soll zusätzlich zur bestehenden Route (TEDGO\_alt) eingeführt werden
- Erwartete Auslastung ca. 30 %

# Sachverhaltsdarstellung

Ziele der geplanten Routenanpassung:

- Umfliegung von Räumen mit hoher Bevölkerungsdichte und damit geringere negative Auswirkungen des Fluglärms
- Großräumige Lärmentlastung und gleichzeitige Reduktion der Emissionen bei geringer Umbelastung
- kürzere Flugstrecken und -zeiten
- CO2-Einsparung

# Aufgabenstellung

Fluglärmbeurteilungen zum in Diskussion stehenden neuen Abflugverfahren RWY 07 zum Wegpunkt TEDGO:

- Rechnerische Ermittlung der Fluglärmbelastung (Mittelungspegel) im Beurteilungszeitraum Tag (06 bis 22 Uhr) im Untersuchungsgebiet für
  - den heutigen Flugbetrieb (Referenzjahr 2019) und
  - den künftigen Flugbetrieb (Prognosejahr 2030)unter Zugrundelegung von
  - 0 %
  - 33 %
  - 100 %Umverlegung von Abflügen von TEDGO\_alt auf TEDGO\_neu
- Rechnerische Ermittlung der Maximalpegel im Untersuchungsgebiet
- Rechnerische Ermittlung der Maximalpegelverteilung in 1-dB- und 5-dB-Klassen für ausgewählte Immissionsorte
- Rechnerische Ermittlung der Anzahl hoch lärmbelästigter Personen (HA, highly annoyed) unter Anwendung der aktuellen Expositions-Wirkungsbeziehung nach UBA (2019) für jedes Szenario gemeindespezifisch und summarisch

# Flugbewegungszahlen (6vM) 2019/2030

| Flugbewegungen |                 | gesamt | davon TEDGO | davon TEDGO alt | davon TEDGO neu |
|----------------|-----------------|--------|-------------|-----------------|-----------------|
| 2019           | 0 % TEDGO neu   | 76.747 | 1.403       | 1.403           | 0               |
| 2019           | 33 % TEDGO neu  | 76.747 | 1.403       | 937             | 466             |
| 2019           | 100 % TEDGO neu | 76.747 | 1.403       | 5               | 1.398           |
| 2030           | 0 % TEDGO neu   | 84.016 | 1.548       | 1.548           | 0               |
| 2030           | 33 % TEDGO neu  | 84.016 | 1.548       | 1.037           | 511             |
| 2030           | 100 % TEDGO neu | 84.016 | 1.548       | 14              | 1.534           |
